

# Android ログの出力

[[Android](#)][[Java](#)][[Eclipse](#)]

## Eclipse へログの出力

LogCat を開く

- Window - Show View - LogCat

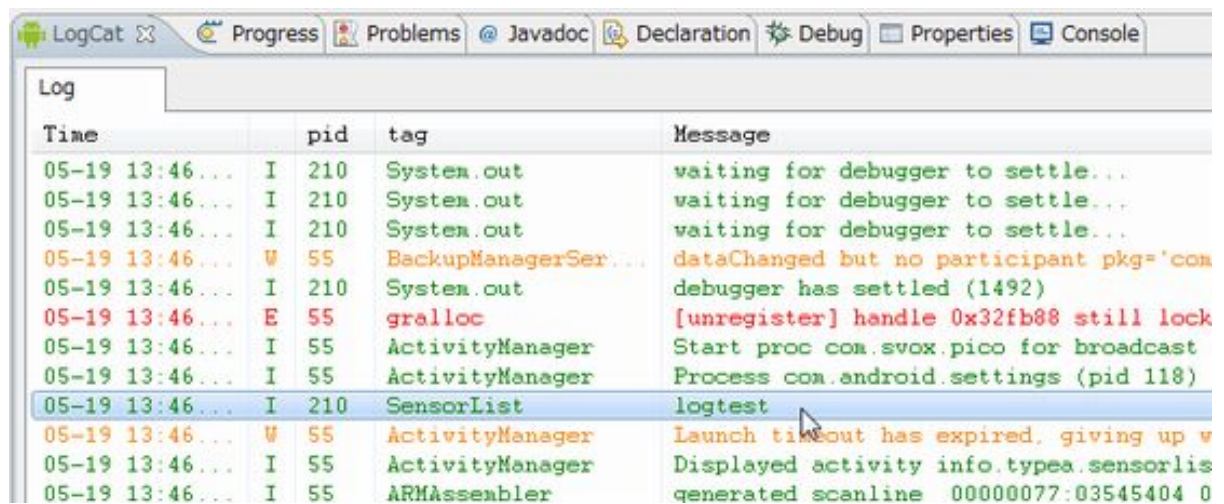

## コード例

- android.util.Log を使う
- <http://developer.android.com/reference/android/util/Log.html>

```
import android.app.Activity;
import android.os.Bundle;
import android.util.Log;

public class SensorListActivity extends Activity {
    private final String LOG_TAG = "SensorList";
    /** Called when the activity is first created. */
    @Override
    public void onCreate(Bundle savedInstanceState) {
        Log.i(LOG_TAG, "logtest");
        super.onCreate(savedInstanceState);
        setContentView(R.layout.main);
    }
}
```

ログが出力されたところ
